

Lavanya Gupta

Data Analyst | Python Developer

✉ lavanyaprofilo@gmail.com ☎ 8130336620 🔗 LinkedIn 🌐 GitHub

PROFILE

B.Tech Information Technology student focused on Artificial Intelligence and Machine Learning, with hands-on experience in data preprocessing, exploratory data analysis, and data visualization. Strong foundation in Python programming, statistical analysis, feature engineering, model evaluation, and problem-solving.

EDUCATION

DR. AKHILESH DAS GUPTA INSTITUTE OF PROFESSIONAL STUDIES, IPU

2023- Present | B.Tech in Information Technology

KULACHI HANSRAJ MODEL SCHOOL, DELHI

2022-2023 | Class XII

2020-2021 | Class X

PROFESSIONAL EXPERIENCE

Lagazon.ai Technologies — Data Analytics Intern

New Delhi, India | May 2026 – Aug 2026

- Built a **4-page Power BI Sales Analytics Dashboard** using the AdventureWorks dataset, covering sales, product, customer, regional, and YoY performance.
- **Created 20+ DAX measures** for KPIs including Revenue, Profit, Margin %, Orders, and Customer Count.
- **Analyzed 5 key business areas** — sales trends, product performance, customer insights, regional performance, and YoY comparisons — through interactive visualizations.
- **Implemented 4 interactive reporting features** — slicers, drill-throughs, bookmarks, and dynamic visualizations — to improve report navigation and usability.

SKILLS

Programming: Python, SQL, JavaScript

Machine Learning: Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, Scikit-learn, NLP

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Data Preprocessing

Deep Learning: PyTorch

Data Visualization & BI: Power BI, DAX, Power Query

Web Technologies: HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Google Cloud

PROJECTS

Fake Review Analyzer

Python, Machine Learning, Scikit-learn, Flask

- Developed an end-to-end machine learning web application to detect potentially fake customer reviews using Natural Language Processing and classification techniques. Built and trained the model using Python and Scikit-learn, and deployed an interactive web interface using Flask for real-time review analysis.

Customer Churn Predictor

Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Developed a machine learning classification model to predict customer churn.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering to prepare customer data for modeling.
- Trained and evaluated classification models using appropriate model evaluation metrics.
- Analyzed customer attributes and model predictions to identify patterns associated with customer churn.

Jarvis – AI Voice Assistant

Python, Speech Recognition, Text-to-Speech, APIs

- Developed a Python-based voice assistant capable of processing voice commands and executing automated tasks.
- Integrated speech recognition, text-to-speech, and APIs to enable voice-based interaction.
- Implemented command processing and automation features for common user tasks.
